DETAILED ACTION

Status of Application, Amendments, And/Or Claims:

Applicants' response of 9 June 2008 is acknowledged. Claim 50 is amended and amendment made of record. Claims 64-75 are newly presented and entered into the record.

In view of newly presented claims, additional restriction is required.

Restriction is required under 35 U.S.C. 121 and 372.

Group I, claim(s) 50 in part, 64-68 in part, 69, and 74-75 in part, drawn to a method of inhibiting cell cycle wherein the inhibitor inhibits Nup153-COPI interaction.

Group II, claim(s) 50 in part, 64-68 in part, 70-73, and 74-75 drawn to a method of inhibiting cell cycle wherein the inhibitor binds to Nup 153.

-

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: multiple processes are claimed.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144.

If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
